PROGRAMMABLE

Program Filter run times
Same day Spa program

EASY INSTALLATION AND MAINTENANCE

Plugs into 240volt power, eliminating the need for hardwiring or costly electrical installations and service

Also available in the Aqua Range

AquaFill is an automatic water leveller with a motorised valve that operates just as effectively under mains or gravity fed water pressure.

AquaFill is a convenient set and forget device for use in swimming pools, spas, water features, ponds or any other body of water.

Preset timed automatic filling options allow you to choose fill periods depending on the volume of water required.

AquaSwitch is a versatile controller that allows you to control jet pumps, spa blowers, pool and spa lights, water

features, garden lights and a host of other appliances. Easy to install, the AquaSwitch is an electrically operated low voltage plug in controller. Coupled with a Gemini Button, the AquaSwitch allows you remote operation at the touch of a button. AquaSwitch is available as a Single or Dual switch and both have an optional time out function.
