

EDC

EQUIPMENT DEBRIS CANISTER

FROM THE WORLD'S #1 IN-FLOOR
CLEANING SYSTEMS COMPANY

Includes

- EDC canister
- Clear bayonet lid
- Plastic debris basket

Optional

- Fine mesh bag

FORM + FUNCTION EQUALS A CLEAN POOL

The main reason to own a pool is to enjoy the refreshing, clean water. The high capacity Equipment Debris Canister (EDC) is designed to capture more debris, reduce cleaning time and enhance the overall aesthetics of your pool design. More fun time less clean time.

Every design feature of the EDC has been taken into consideration. We took the simple debris canister and transformed it into a highly effective, efficient, easy to install equipment side debris canister. The EDC is plumbed before the circulation pump to trap debris from spa, skimmer and main drain lines before it reaches the pump and filter. The EDC is a cut above the rest. The basket holds up to 68% more debris than any other equipment side canister and an optional fine mesh bag will filter out smaller debris. The sturdy, vertical bayonet handles make it easy to remove the cover and basket to dispose of the debris. Its high efficiency design ensures maximum water flow with minimal pressure loss.

Sleek & Durable

The EDC was also designed with aesthetics in mind. Not only is it sleek, it is constructed of weather and UV resistant thermo plastics for long term durability. The design goes beyond the EDC, by having the debris canister located at the equipment pad it eliminates an extra deck lid to give your pool deck a cleaner look.

Basket holds up to

68% more debris
than any other equipment side canister

Cleanest Pool Possible

The EDC is even more effective with Paramount's in-floor cleaning and circulation system. Debris is swept into Paramount's MDX-R3 debris drain by powerful jets of water where it is transported to the high capacity EDC for easy removal. Giving you a clean, healthy pool with minimal maintenance. Now That's Pool Life Simplified™.

FROM THE WORLD'S #1 IN-FLOOR
CLEANING SYSTEMS COMPANY

FEATURES AND BENEFITS

- Conveniently located and mounted at the equipment pad for easy installation and maintenance
- Plumbed before the circulation pump to trap debris from spa, skimmer and main drain lines before it reaches the pump and filter
- Extra large capacity debris basket means fewer trips to empty canister
- Convenient clear, pressure safe lid
- Eliminates an additional deck lid for a cleaner looking pool deck
- Constructed of weather and UV resistant thermo plastics for long term durability
- The bayonet handles make debris removal quick and easy
- High efficiency design ensures maximum water flow with minimal pressure loss
- Ports for plumbing in the optional Clear O3 ozone water purifier or vacuum gauge

EFFICIENT, EFFECTIVE, LARGE CAPACITY EQUIPMENT SIDE DEBRIS CANISTER
