

# Gemini

## THE ULTIMATE IN SALT WATER MANAGEMENT

## The Gemini Series

The Gemini System is a fully-controlled salt water management system. Pool water sanitiser and pH levels are continually analysed by the Gemini Control unit, which activates the Gemini salt or mineral salt chlorinator as required and also keeps pH within the optimum range.

- Prevents over-chlorination and bleached pool blankets
- Energy saving
- Fully automatic sanitiser and pH control
- Compatible with mineral salt pools and spas

## Gemini

**Gemini** – is a fully-controlled salt water management system. A multi-electrode probe analyses water chemistry and determines how much chlorine needs to be produced by the electrolytic cell. The probe also assesses the pH of the water and adjusts as necessary.

- **Saves energy and money**
- **Constantly maintains your pool chemistry within safe levels**
- **Prevents over-chlorination**
- **Prevents bleached pool blankets and shells**
- **Prevents bleached pool shells**

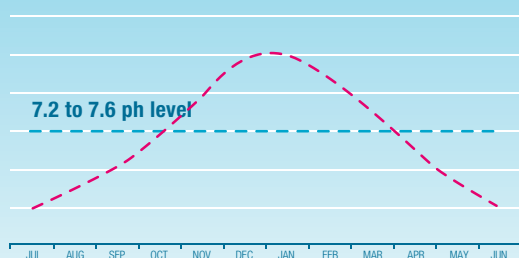

## Gemini Mineral

**Gemini Mineral** – a Gemini system that has been specially configured to automatically manage mineral pools that are increasingly popular with health conscious pool owners. The water chemistry of mineral pools is surprisingly complex, but a Gemini Mineral system takes the guesswork out of managing your pool.

- **Fully automatic sanitiser and pH control**
- **Specially configured for mineral pools**
- **Enjoy the health benefits of a mineral pool without the effort**
- **Extends life of electrolytic cell**

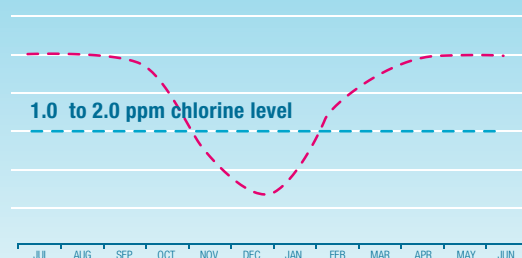

### Graphs illustrating the Gemini Systems total control

pH LEVELS OVER CHANGING SEASONS

- pH Level without automatic PH control
- pH Level with a Gemini Twin System  
(Average daily pH level maintained within the range of 7.2 – 7.6)

CHLORINE LEVELS OVER CHANGING SEASONS

- Chlorine level without automatic control
- Chlorine level with a Gemini Twin System  
(Average daily chlorine level maintained within the range of 1.0– 2.0ppm)

## Gemini +

**Gemini+** - adds a further dimension to pool water management. It comes with a liquid chlorine booster function that allows you to reduce pump running times, saving energy and money. Off-peak power can also be used to help achieve further savings while maintaining a safe and healthy pool.

- **Liquid chlorine booster function**
- **Cuts pump running times in half**
- **Additional energy and cost savings**
- **Effortlessly manages peak bather loads**
