WATER MANAGEMENT SOLUTIONS FOR
SALT & MINERAL POOLS

SG

Salt

ENHANCED SALT WATER MANAGEMENT

The SG Series is a versatile range of quality salt chlorinators for those that prefer a salt water or mineral salt pool. Available with 20g/hr and 30g/hr output, plus optional pH control and additional timed power outlets.

ENJOY THE BENEFITS OF A MINERAL POOL

Mineral salt pools have become increasingly popular in recent years, with many pool owners convinced of the health benefits of minerals. Pool Controls has now launched the SG Mineral and Gemini Mineral salt water management systems specially configured for mineral salt pools.

SG SERIES

WATER MANAGEMENT SOLUTIONS FOR SALT & MINERAL POOLS

STERISEL

Salt

The Sterisel is the simplest product in the range. Developed for the European market, the Sterisel is a simple, untimed salt chlorinator available in two sizes, 20g/hr and 30g/hr.

SG

Mineral

The SG Mineral is a fully-timed control unit specially configured to safely sanitise mineral pools, which are becoming increasingly popular with pool owners seeking the health benefits of minerals. The SG Mineral comes in the larger 30g/hr size and with automatic pH control as standard - essential to maintain the correct balance of a mineral salt pool.

The minerals are generally present as chloride salts, which can be converted to free chlorine by an electrolytic cell. The free chlorine sanitises the pool, and reverts to the mineral salt once its work is done. This means you can be assured that the pool is fully sanitised by chlorine, while enjoying the health benefits of the mineral elements.

SG & SG pH

Salt

The SG Salt Water Chlorinator is a fully-automated system that gives you complete control over your pool water management. Proudly Australian-made and packed with features it is available in two sizes, 20g/hr and 30g/hr.

The SG pH system keeps your pool water in the correct pH range - making the SG pH one of the most efficient and smartest salt chlorinators on the market. The SG pH system comes in the larger 30g/hr size as standard, with pH control delivered via a peristaltic dosing pump.

GEMINI

Mineral

The Gemini Mineral System takes the management of mineral pools to a whole new level. The Gemini Mineral Control Unit analyses water chemistry and activates the Gemini Mineral Salt chlorinator only as needed, whilst maintaining precise pH control.

The Gemini Mineral System saves pool owners time, energy and money while constantly maintaining mineral pool chemistry within optimum levels. A Gemini Mineral System will prevent over-chlorination - which can bleach pool blankets and pool shells.

GEMINI

Salt

The Gemini System represents the ultimate control system for salt water pools. The Gemini System utilises a probe to control levels of chlorine production via a salt chlorinator. The pH of the water and is also monitored and adjusted. The Gemini puts an end to over-chlorination and also results in great energy savings.
