COMBINE ECO-FRIENDLY OZONE AND UV FOR POWERFUL DISINFECTION

The powerful combination of the Ultra UV's germicidal disinfection and ClearO3's oxidation processes kills 99.9% of micro-organisms for a clean, naturally swim ready, family friendly and eco-friendly pool using up to 80% less harmful chemicals.

An additional benefit is the enhanced level of water purification provided as the ozone infused water created by Clear O3 passes through the Ultra UV disinfecting chamber. This converts ozone into advanced oxidizers call Hydroxyl Free Radicals which play a key role in the oxidative destruction of organic pollutants such as pesticides.
